

BIPECOIN (BIC)

Official Whitepaper V5 — Final

BEP20 Token on BNB Smart Chain | Community Driven | DAOR

1. Abstract

Bipecoin (BIC) is a community-driven BEP20 token on BNB Smart Chain with a fixed supply of 5,000,000,000 BIC. The contract is verified on BscScan and published on GitHub. No further minting is possible. Bipecoin follows DAOR — Decentralized, Autonomous, Open & Renounced.

2. Tokenomics

The smart contract **bipecoin.sol** mints 5B BIC once at deployment:

```
MAX_SUPPLY = 5_000_000_000 * 10 ** 18
```

Fixed 5B. No further minting.

Item	Amount / Period	Details
Fixed Supply	5,000,000,000 BIC	Hardcoded in contract, no mint
Burned	400,000,000 BIC	Burned every 2 years
Locked in PinkLock	3.5B	Locked in PinkLock from September 2026 to September 2027 (1B + 2.5B Record 1894705)
Circulating Supply	1,100,000,000 BIC	For liquidity, community, trading

3. Burn Schedule

400M Bipecoin burned every 2 years.

The burn is done by sending tokens to the dead burn address, permanently removing them from circulation. This deflationary mechanism reduces supply over time and increases scarcity.

4. Lock Schedule

3.5B of Bipecoin locked in PinkLock from September 2026 to September 2027.

This includes 1,000,000,000 BIC and 2,500,000,000 BIC (PinkLock Record 1894705) locked in PinkLock. The lock period ensures team commitment and prevents early selling. All locks are verifiable on PinkLock platform. Ownership is renounced, owner balance 0%.

5. Contract Information

Name: Bipecoin

Symbol: BIC

Chain: BNB Smart Chain (BEP20)

Contract: 0x7b72c5362ae7292570cd7bddfa49652328a5bc45

Decimals: 18

Fixed Supply: 5B

Burned: 400M every 2 years

Locked: 3.5B in PinkLock from September 2026 to September 2027

GitHub: github.com/Bipecoin-Bic/Bipecoin-bic

Ownership: Renounced

Ecosystem Duty: Native gas & reserve asset. Powering all apps, tokens, services.

6. Disclaimer

Bipecoin is a community-driven token. No financial advice. Code is fixed 5B supply. Burn of 400M every 2 years and lock of 3.5B from September 2026 to September 2027 are executed via on-chain transactions and PinkLock contracts post-deployment.
